EA

Art Unit: 3621

1.35 U.S.C. . 101 reads as follows:

"Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title".

2. Claims 11-42 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-13, 15-20,22-34 of prior U.S. Patent No. 6,665,536. This is a double patenting rejection.

((patent=application) 1=11, 2=12, 3=13, 4=14, 5=15, 6=16, 7=17, 8=18, 9=19, 10=20, 11=21, 12=22, 13=23, 15=24, 16=25, 17=26, 18=27, 19=28, 20=29, 22=30, 23=31, 24=32, 25=33, 26=34, 27=35, 28=36, 29=37, 30=38, 31=39, 32=40, 33=41, 34=42)

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-10, drawn to hybrid spread spectrum network, classified in class 375, subclass 131.

II. Claims 11-42, drawn to wireless LAN, classified in class 455, subclass 432.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects

Art Unit: 3621

(MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions do not require the particulars of each other, i.e. hybrid spread spectrum communication of Group I is not required in the claims of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

It is also noted that the claims of group I appear readable on the definition of subclass 131 of class 375 and most patents therein.
